Area
User Documentation

How to create an Area?
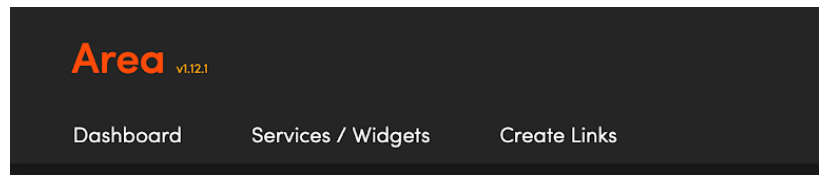

1) Login / Register

First go to https://ayworld.space
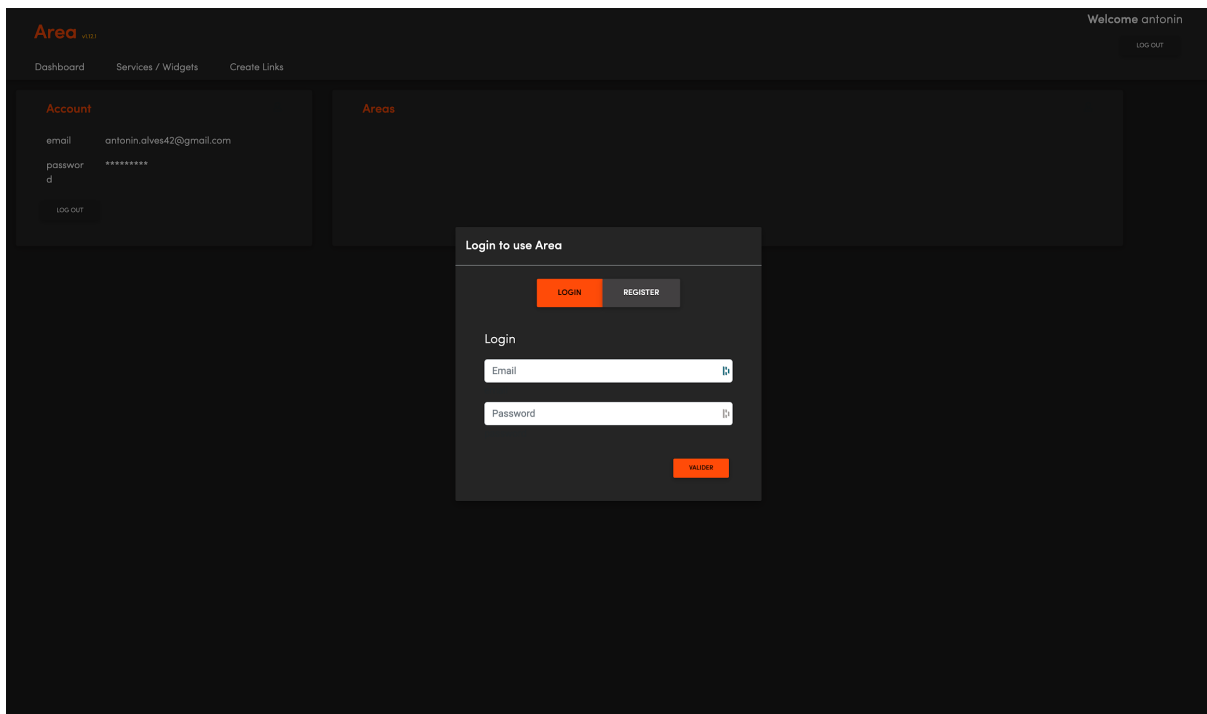

You will need to login or to register.
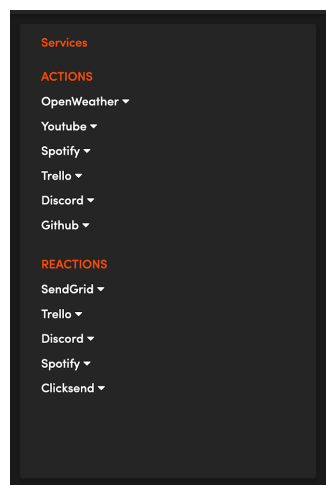

2) Creation Panel

Once you're logged in, see the Navigation bar and click on "Create Links"

Welcome to the Area configuration Panel!

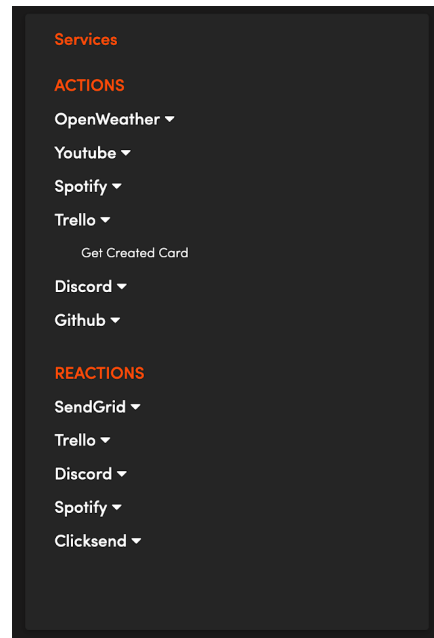

You can see the list of the Services on the left...

And this is the panel where you will add all the service you want

3) Connect to Service

To use the differentes Services widgets, you will need to connect to them.
To do that you will click on the service of your choice in the list. And then click on the widget you want.

You can see know Something new appear in the creation panel.
This is the Widget configuration.

You need to click on the "connect" button that will redirect you to the service page and log you in the application with the service token.

4) Create a new Area

To finally create a new Area you will need to fill the Parameter of the widget you choose. In the example we need to give to Trello **Board ID**.
Do the same thing to the second part of the Area.

Once you give all the parameters, You should have something like this.

You can now click on the "Create Area" button.

5) Control your Area

Once you have created your area you may be redirected to the Dashboard page.
There you can see all your Areas, their names and all information about. You can also pause them and delete them.
